

Key to Year-Span of Documents

Years Available

Example:

Year-span of archival material

1892–1939 (material from 1892 to 1939, with no known gaps)

1892/1939 (material within these years, but with gaps)

Important Note to Remember

The inventory lists provided by archives in Ukraine, Belarus, Lithuania and Moldova often list only the year-span of documents, followed by the archival numbers. Thus, it is not always possible to identify which archival number corresponds to a particular year or year-span.

Example: 1842–1844; 1857; 1859–1861; 1873

270/2/4,7,9,12;273/1/3–4;279/1/78

Therefore, the archival inventories in this database should be used **in conjunction with** the *fond/opis/delo* numbers (or names) assigned by each archive.
